

So where do those who serve in the military come from...??? They come from us...The people of America. A nation formed 235 years ago...A nation that is just beginning by historical standards.

A nation that the world said would never be formed & certainly would never last.

That we wouldn't survive the depression...That we wouldn't survive the Dust Bowl...That we would lose ww2...And be forever divided by Vietnam...A nation that could never recover from the 9/11 attacks.

Well, by the Grace of god and the courage of the American people we're still here.

And the type of courage I'm talking about...The courage that allows this country...Our country to survive & thrive was instilled in us from our fore-fathers who believed in this nation.....Our Nation.

We believe in freedom.

We believe in defending freedom.

And more importantly...We believe in America.
